Table of Contents

Part 1

Keynote

Designing Socio-Technical Environments in Support of Meta-Design and Social Creativity
Gerhard Fischer...............................................................................................................................1

Symposia

Evaluating the Quality of Dialogical Argumentation in CSCL: Moving Beyond an Analysis of Formal Structure
Douglas Clark, Victor Sampson, Armin Weinberger, Gijsbert Erkens.............................................11

Fostering Peer Collaboration with Technology
Janice Gobert, James Slotta, Jody Clarke, Chris Dede, Hannie Giijlers, Nadira Saab, Wouter van Joolingen, Ton de Jong, Ken Koedinger.................................................................21

Redefining Learning Goals of Very Long-Term Learning Across Many Different Fields of Activity
Naomi Miyake, Roy Pea, Brigid Barron, Daniel L. Schwartz, Lee Martin, Rogers Hall, Ken Wright, and Karen Wieckert.................................................................26

Orchestrating Learning Activities on The Social and The Cognitive Level to Foster CSCL
Armin Weinberger, Douglas Clark, Pierre Dillenbourg, Dejana Diziol, Victor Sampson, Karsten Stegmann, Nikol Rummel, Fabrice Hong, Hans Spada, Bruce McLaren, Taiga Brahm, and Frank Fischer.................................................................36

Papers

Classroom Model, Model Classroom: Computer-Supported Methodology for Investigating Collaborative-Learning Pedagogy
Dor Abrahamson, Paulo Blikstein, and Uri Wilensky.................................................................46

Learning from Virtual Interaction: A Review of Research on Online Synchronous Groups
Anindito Aditomo and Peter Reimann.................................................................56

Drawing on Practices for Modeling Socio-Technical Systems
Heidrun Allert and Christoph Richter.................................................................66

Technology in a Context: Enabling Students to Collaboratively Participate at the Interface of Computation and Social Science
Richard Alterman and Johann Larusson.................................................................69
Supporting Collaborative Learning in Online Higher Education through Activity Awareness
Chris Amelung, James Laffey, and Paul Turner.................................................................72

Virtual Communities of Care: Online Peer Networks with Post-Organ Transplant Youth
Marina Bers, Clement Chau, Keiko Satoh, and Laura Beals..................................................75

Learning About Transfer in an Online Problem-Based Course
Alan Bitterman, Natalie Hatrak, and Cindy Hmelo-Silver....................................................78

Just a Cog in the Machine: Participatory Robotics as a Tool for Understanding Collaborative Learning and Decision-making
Paulo Blikstein, William Rand, and Uri Wilensky...............................................................81

Why Technology Isn't Making a Difference: Coming to Terms with Ubiquitous Learning in High School Classrooms
Erica Boling.........................................................................................................................84

Interaction Analysis in Asynchronous Discussions: Lessons Learned on the Learners’ Perspective, Using the DIAS System
Tharrenos Bratitsis and Angelique Dimitracopoulou............................................................87

Supporting Controversial CSCL Discussions with Augmented Group Awareness Tools
Juergen Buder and Daniel Bodemer.....................................................................................90

Boda Blocks: A Collaborative Tool for Exploring Tangible Three-Dimensional Cellular Automata
Leah Buechley and Michael Eisenberg................................................................................99

The Organization of Collaborative Math Problem Solving Activities across Dual Interaction Spaces
Murat Cakir, Alan Zemel, and Gerry Stahl.........................................................................102

Fostering Knowledge Building Using Concurrent, Embedded and Transformative Assessment for High- and Low-Achieving Students
Carol K.K. Chan, Eddy Y.C. Lee..........................................................................................105

Creativity, Collaboration and Competence: Agency in Online Synchronous Chat Environment
Elizabeth Charles and Wesley Shumar................................................................................115

Towards a Community Incubator: The ICAP Design Framework for Social Constructivist Educational Designers
Der-Thanq "Victor" Chen, David Hung...............................................................................124
Using Social Network Analysis to Explore the Dynamics of Tele-mentors' Meta-support in Practice
Fei-Ching Chen, Ho-Ming Jiang.................................................................128

Effects of Previous Messages' Evaluations, Knowledge Content, Social Cues and Personal Information on the Current Message During Online Discussion
Gaowei Chen, Ming Ming Chiu.................................................................132

Understanding Pair-Programming from a Socio-cultural Perspective
Weiqin Chen, Marius Nordbo.................................................................135

Learning Writing By Reviewing in Science
Kwangsu Cho, Christian Schunn, and Kyungbin Kwon.............................138

MUVEs as a Powerful Means to Study Situated Learning
Jody Clarke and Chris Dede.................................................................141

Using Social Network Analysis to Highlight an Emerging Online Community of Practice
Anthony Cacciolo, Hui Soo Chae, and Gary Natriello..............................145

Mentored Professional Development to Support Successful Integration of Technology-enhanced Science Curriculum
Stephanie Corliss, Michele Spitulnik, Tara Higgins, and Doug Kirkpatrick...150

A Theoretical Framework of Collaborative Knowledge Building with Wikis – a Systemic and Cognitive Perspective
Ulrike Cress and Joachim Kimmerle...................................................153

Impact of Anonymity of Input in Next-Generation Classroom Networks
Sarah Davis.........................................................................................162

Computer Supported Moderation of E-Discussions: the ARGUNAUT Approach
Reuma De Groot, Raul Drachman, Rakheli Hever, Baruch B. Schwarz, Ulrich Hoppe, Andreas Harrer, Maarten De Laat, Rupert Wegerif, Bruce M. McLaren, and Benoit Baurens........165

Fostering Audience Design of Computer-Mediated Knowledge Communication by Knowledge Mirroring
Jessica Dehler, Daniel Bodemer, and Juergen Buder.................................168

A Reflective Analysis of Facilitation in an Online Problem-Based Learning Activity
Sharon Derry and Matt DelMarcelle....................................................171

From Socially-mediated to Technology-mediated Coordination: A Study of Design Tensions Using Group Scribbles
Yannis Dimitriadis, Juan Ignacio Asensio-Pérez, Davinia Hernandez-Leo, Jeremy Roschelle, John Brecha, Deborah Tatar, Raj Chaudhury, Chris DiGiano, and Charles Patton........181
PhysHint: A Qualitative Study of Student's Cognitive Elaboration in CSCL
Ning Ding.................................................................184

An Innovative Approach for Fostering Computer-Supported Collaboration
Tanja Engelmann and Sigmar-Olaf Tergan.................................................................187

Helping Teachers in Designing CSCL Scenarios: a Methodology Based on the LDL Language
Christine Ferraris, Christian Martel, and Laurence Vignollet........................................190

Illegitimate Practices as Legitimate Participation: Game Cheat Sites in a Teen Virtual World
Deborah Fields and Yasmin Kafai.................................................................193

Tracing Insider Knowledge Across Time and Spaces: A Connective Ethnography in a Teen Online Game World
Deborah Fields and Yasmin Kafai.................................................................196

Making Thinking Visible: Growth in Graphical Literacy, Grades 3 to 4
Yongcheng Gan, Marlene Scardamalia, Huang-Yao Hong, and Jianwei Zhang.........................206

Turning on Minds with Computers in the Kitchen: Supporting Group Reflection in the Midst of Engaging in Hands-on Activities
Christina Gardner and Janet Kolodner.................................................................209

Intuitive Moderation Styles and Beliefs of Teachers in CSCL-based Argumentation
Julia Gil, Baruch B. Schwarz, and Christa S. C. Asterhan..................................................219

Using Online Social Networks to Support Underrepresented Students’ Engagement in Postsecondary Education
Christine Greenhow and Kimberly Schultz.................................................................229

Evaluating the Effect of Feedback from a CSCL Problem Solving Environment on Learning, Interaction, and Perceived Interdependence
Gahgene Gweon, Carolyn Rose, Emil Albright, and Yue Cui...........................................231

Reality Television, Fan behavior, and Participation in Online Communities of Practice
Erica Halverson...........................................................................................................241

Principles and Grand Challenges for the Future: A Prospectus for the Computer-Supported Collaborative Learning (CSCL) Community
Eric Hamilton...........................................................................................................244

Demonstration of a Discussion Terminal for Knowledge Acquisition and Opinion Formation in Science Museums
Kristin Knipfer, Carmen Zahn, and Friedrich W. Hesse.................................376

Are Core Objectives of Web-based Collaborative Inquiry Learning Already Core Learning Prerequisites? The Case of Argumentation Competences and Computer Literacy
Ingo Kollar, Christof Wecker, Frank Fischer, Carmen Kohnle, and James Slotta........379

Fostering Argumentation with Script and Content Scheme in Videoconferencing
Birgitta Kopp, and Heinz Mandl........................................................................382

From Theory of Mind to a Theory of Distributed Shared Sense-Making
Barbara Ladewski, Annemarie S. Palincsar, Joseph S. Krajcik.............................392

The Role of Problematizing Moves in Online Knowledge Building Activities
Ming Lai.............................................................................................................395

Let’s Read Together: An Evaluation of a Computer Assisted Reciprocal Early English Reading System
Yu-Ju Lan, Yao-Ting Sung, and Kuo-En Chang..................................................405

A Learnable Content & Participation Analysis Toolkit for Assessing CSCL Learning Outcomes and Processes
Nancy Law, Johnny Yuen, Ronghuai Huang, Yanyan Li, and Nicol Pan..............408

Promoting Collaborative Learning in Higher Education: Design Principles for Hybrid Courses
Rachel Levin-Peled, Yael Kali, and Judy Dori..................................................418

CSCL Interaction Analysis for Assessing Knowledge Building Outcomes: Method and Tool
Yanyan Li, Jian Liao, Jing Wang, and Ronghuai Huang.................................428

Implementation of the Scrabble Game on the Mobile Devices to Increase English Vocabulary Acquisition
Chiu-Pin Lin, Shelley S.-C. Young, Hui-Chung Hung, and Yi-Chen Lin...............438

Studying the Effects of Scripts and Technology on Cooperative Learning
Guan-Yu Lin, James M. Laffey, and Kristin A. Buss........................................441

Learning from Digital Video: An Exploration of How Interactions Affect Outcomes
Robb Lindgren, Roy Pea, Sarah Lewis, and Joe Rosen....................................444

Fostering Collaborative Problem Solving for Pupils with Cognitive Disabilities
Andreas Lingnau, Peter Zentel, and Ulrike Cress..............................................447
Part 2

Papers (continued)

Computer-supported Collaborative Learning and Conceptual Change
Lei Liu, Cindy Hmelo-Silver .......................................................... 450

Enabling Organizational Learning through Event Reporting: A Case Study in a Health Care Context
Pei-Ju Liu, James Laffey, and Karen Cox ........................................ 460

About the Complexity of CSCL Systems
Jacques Lonchamp ........................................................................ 463

Do Internal Factors of Cooperation Influence Computer-mediated Distance Activity?
Kristine Lund, Céline Rossetti, and Stephanie Metz ......................... 466

Web based Platforms in Co-located Practice - The Use of a Wiki as Support for Learning and Instruction
Gustav Lymer, Johan Lundin, Barry Brown, Mattias Rost, and Lars Erik Holmquist ........... 476

Patterns of Collaboration in Design Courses: Team Dynamics Affect Technology Appropriation, Artifact Creation, and Course Performance
Heidy Maldonado, Brian Lee, Scott Klemmer, and Roy Pea .................. 486

Catalysts to Creating Representational Tools and the Benefits for Learning
Lee Martin, and Daniel Schwartz .................................................. 496

The Effects of Conversations with Regulars and Administrators on the Participation of New Users in a Virtual Learning Community
Yevgeniy Medynskiy, and Amy Bruckman .................................... 499

An Efficient and Flexible Technical Approach to Develop and Deliver Online Peer Assessment
Yongwu Miao, and Rob Koper ..................................................... 502

ProBoPortable: Does the Cellular Phone Software Promote Emergent Division of Labor in Project-Based Learning?
Toshio Mochizuki, Hiroshi Kato, Kazaru Yaegashi, Toshihisa Nishimori, Yusuke Nagamori, and Shinobu Fujita ...................................................... 512

Source Memorization in Chat Interactions
Gaëlle Molinari, Patrick Jermann, and Pierre Dillenbourg .................. 515
The Integration of Synchronous Communication across Dual Interaction Spaces
Martin Mühlpfordt, and Gerry Stahl.................................................................518

Effects of Synchronous and Asynchronous CMC on Interactive Argumentation
Lisette Munneke, Jerry Andriessen, Paul Kirschner, and Gellof Kanselaar..................528

Toward Collaborative Technologies Supporting Cognitive Skills for Mutual Regard
Tom Murray........................................................................................................538

Hanni Muukkonen, Kai Hakkarainen, Kari Kosonen, Satu Jalonen, Annamari Heikkil, Kristi Lonka, Katarina Salmela- Aro, Juha Linnanen, and Kari Salo...........................................541

Exploring Embedded Guidance and Self-efficacy in Educational Multi-user Virtual Environments
Brian Nelson, and Diane Ketelhut........................................................................544

The Fourth Man – Supporting self-organizing group formation in learning communities
Nils Malzahn, Andreas Harrer, and Sam Zeini......................................................547

Argumentation Vee Diagrams (AVDs) Enrich Online Discussions
E. Michael Nussbaum, Denise L. Winsor, Yvette M. Aqui, and Anne M. Poliquin..........551

A Tale of Two Formats
Angela O'Donnell, and Nicole DiDonato...............................................................554

The Impact of 3-D Based Group Interactions in an On-line Problem-based Learning Environment
Nicholas Omale, Wei-Chen Hung, Lara Luetkehans, and Jessamine Cooke-Plagwitz........557

Examining the Dual Function of Computational Technology on the Conception of Mathematical Proof
Diler Oner..............................................................................................................560

Complex Network Theory Approach to the Assessment on Collective Knowledge Advancement through Scientific Discourse in CSCL
Jun Oshima, and Ritsuko Oshima...........................................................................563

Appropriation of a Graphical Shared Workspace: The Learner-Tool Connection
Maarten Overdijk, and Wouter Van Diggelen.......................................................566

Expressive Pen-Based Interfaces for Math Education
Sharon Oviatt, Alexander Arthur, Yaro Brock, and Julia Cohen...............................569
Epistemological perturbations: Using material artifacts to cultivate a knowledge building culture in classrooms
John Ow, and Katerine Bielaczyc………………………………………………………………579

Online but Off-topic: Establishing Common Ground in Small Learning Groups
Trena Paulus…………………………………………………………………………………….582

Collaboration, Computation, and Creativity: Media Arts Practices in Urban Youth Culture
Kylie Peppler, and Yasmin Kafai………………………………………………………………586

Student Competition in Computer-Mediated Conferencing Courses
Vanessa Peters, and Jim Hewitt………………………………………………………………..589

Wiki Design For Teacher Interventions In Collaborative Production
Ingvill Rasmussen, Andreas Lund, and Ole Smoerdal……………………………………….592

Scaffolding Preservice Teachers Online: The Roles of Interest and Mathematical Beliefs
Lillian S. Ray, and K. Ann Renninger………………………………………………………….595

Time is Precious: Why Process Analysis is Essential for CSCL (and can also help to bridge between experimental and descriptive methods)
Peter Reimann…………………………………………………………………………………….598

Engaging Students in Science Controversy Through an Augmented Reality Role-Playing Game
Eric Rosenbaum, Eric Klopfer, Britton Boughner, and Louisa Rosenheck…………………….608

How Does Net-Based Interdisciplinary Collaboration Change with Growing Domain Expertise?
Nikol Rummel, Sabine Hauser, and Hans Spada………………………………………………611

Partner Modeling Is Mutual
Mirweis Sangin, Nicolas Nova, Gaelle Molinari, and Pierre Dillenbourg……………………621

Tools of Play: Coordinating Games, Characters, and Actions While Learning to Play Video Games
Tom Satwicz, and Reed Stevens………………………………………………………………..629

Video Traces: Creating Common Space between University and Public Schools for Preparing New Teachers
Amit Saxena, and Reed Stevens………………………………………………………………..639

Process Gain: A Task on Which Real Groups Outperformed Invididuals Modeled Under Perfect-Knowledge-Sharing Assumptions
David Sears……………………………………………………………………………………..642
Improving Young Learners’ Scientific Understanding in CSCL Environments
Hyo-Jeong So.................................................................645

Constructing New Knowledge in Collaboration: Instructional Support for Improving Information Pooling and Processing in Groups
Hans Spada, and Anne Meier...........................................648

Meaning Making in CSCL: Conditions and Preconditions for Cognitive Processes by Groups
Gerry Stahl...............................................................651

Collaborative Argumentation and Cognitive Processing - An Empirical Study in a Computer-Supported Collaborative Learning Environment
Karsten Stegmann, Christof Wecker, Armin Weinberger, and Frank Fischer.........................661

Wearable Tag Clouds: Visualizations to Facilitate New Collaborations
Daniel Steinbock, Roy Pea, and Byron Reeves..................................................671

Massively Multiplayer Online Games & Education: An Outline of Research
Constance Steinkuehler..................................................674

Analyzing Collaborative Processes and Learning from Hypertext Through Hierarchical Linear Modelling
Agni Stylianou-Georgiou, Elena Papanastasiou, and Sadhana Puntambekar.........................685

A Framework for Eclectic Analysis of Collaborative Interaction
Daniel Suthers, Nathan Dwyer, Richard Medina, and Ravi Vatrapu.................................694

Conceptual Representations Enhance Knowledge Construction in Asynchronous Collaboration
Daniel Suthers, Ravi Vatrapu, Richard Medina, Sam Joseph, and Nathan Dwyer.................704

Information Sharing is Incongruous with Collaborative Convergence: The Case for Interaction
Daniel Suthers, Richard Medina, Ravi Vatrapu, and Nathan Dwyer.................................714

Using Learning Management Systems to Support Students' Collaborative Learning in Higher Education
Stephanie D. Teasley, and Steven Lonn..............................................717

Tools for Concurrent, Embedded, and Transformative Assessment of Knowledge Building Processes and Progress
Chris Teplovs, Zoe Donoahue, Marlene Scardamalia, and Donald Philip.........................720

Boundary Conditions for Applying Argumentative Diagrams
Marije Van Amelsvoort, and Seger Breugelmans..................................................723
Small-group Face-to-Face Discussions in the Classroom: A New Direction of CSCL Research
Wouter Van Diggelen, and Maarten Overdijk

The Use of "Knowledge Types" as Scripting Tool to Enhance Critical Thinking in Online Discussions
Hilde Van Keer, Tammy Schellens, Bram De Wever, and Martin Valcke

Effects of Technology-based Support for Explanation Construction on Learners' Discourse during Design-based Learning in Science
Swaroop Vattam, Christopher Kramer, Hyungsin Kim, and Janet Kolodner

The Student Becomes the Master: Integrating Peer Tutoring with Cognitive Tutoring
Erin Walker, Nikol Rummel, Bruce McLaren, and Kenneth Koedinger

Thinking Hard Together: the Long and Short of Collaborative Idea Generation in Scientific Inquiry
Hao-Chuan Wang, Carolyn Rose, Yue Cui, Chun-Yen Chang, Chun-Chieh Huang, and Tsai-Yen Li

Fading Scripts in Computer-Supported Collaborative Learning: The Role of Distributed Monitoring
Christof Wecker, and Frank Fischer

Coordination Dynamics in CSCL based Chat Logs
Miriam Weinel, and Peter Reimann

Interdisciplinarity in the CSCL Community – an Empirical Study
Martin Wessner, and Andrea Kienle

Designing Collaborative Mathematics Activities for Classroom Device Networks
Tobin White, Kevin Lai, and Garrett Kenehan

Online Video Repository and Supportive Community for Beginning Teachers
Greg Wientjes, and Jawed Karim

Professional Visions in the Liminal Worlds of Graphs
Ken Wright

Fostering Students' Participation in Face-to-Face Interactions and Deepening Their Understanding by Integrating Personal and Shared Spaces
Etsuji Yamaguchi, Shigenori Inagaki, Masanori Sugimoto, Fusako Kusunoki, Akiko Deguchi, Yuichiro Takeuchi, Takao Seki, Sanae Tachibana, and Tomokazu Yamamoto
Understanding Classroom Culture Through a Theory of Dialogism: What Happens When Cheating and Collaboration Collide?  
Sarita Yardi, and Dan Perkel

Exploring the Potential of a Handheld Participatory Simulation and Social Network Application for Revealing Decision-Making Processes for Information Seeking Amongst Middle School Students  
Susan Yoon

The Disembodied Act: Copresence and Indexical Symmetry in Computer-mediated Communication  
Alan Zemel, Wesley Shumar, and Murat Cakir

Information as a Social Achievement: Collaborative Information Behavior in CSCL  
Nan Zhou, Alan Zemel, and Gerry Stahl

Workshops

New Authoring Frameworks for Integrating Collaborative Learning Technologies  
Turadg Aleahmad, Jim Slotta

The Third Metaphor of Learning  
Jerry Andriessen, Baruch Schwarz

The Use of CSCL Design Patterns as a Vehicle for Effective & Efficient Learning Designs: Linking Patterns to Authentic Educational Case Studies  
Yiannis Dimitriadis, Symeon Retalis, Chris DiGiano

Networked Learning and CSCL  
Christopher Jones

Wiki Research: Knowledge Advancement and Design  
Andreas Lund, Palmyre Pierroux, Ingvill Rasmussen, Ole Smordal, Eli Blevis

Introduction to Computer Supported Collaborative Learning  
Naomi Miyake

An Interactive Session Using a Tool to Support Distributed Conversations around Digital Video  
Roy Pea, Shelly Goldman, Robb Lindgren, Joe Rosen

Chat Analysis in Virtual Math Teams  
Gerry Stahl
Towards the Convergence of CSCL and Inquiry Learning: Scripting Collaborative Inquiry Learning
Karsten Stegmann, Ingo Kollar, Jan Zottmann, Hannie Gijlers, Ton de Jong, Pierre Dillenbour, James Slotta, Frank Fischer

Languages and Platforms for CSCL Scripts
Armin Weinberger, Miky Ronen, Pierre Tchounikine, Andreas Harrer, Pierre Dillenbour, Jorg Haake, Yael Kali, Frank Fischer, Dan Kohen-Vacs

Doctoral Consortiums

Computational Metaphor Extraction to Encourage Critical Reflection and Support Epistemological Pluralism
Eric Baumer

How Online Small Groups Create and Use Mathematical Objects to do Collaborative Problem Solving
Murat Perit Cakir

Knowledge Mirroring: Fostering Computer-Mediated Collaboration and Learning
Jessica Dehler

The Impact of Collaboration on Procedural and Conceptual Knowledge Acquisition in Algebra Learning
Dejana Diziol

Knowledge Acquisition and Opinion Formation at Science Museums: The Potential of a Discussion Terminal for Collaborative Elaboration on Controversial Issues
Kristin Knipfer

The Effects of Knowledge Awareness on Peer Interaction and Shared Mental Model in CSCL
Sukjin Kwon

Trajectories of Collaborative Scientific Conceptual Change: A Classroom Study in a CSCL Environment
Lei Liu

Goal-Awareness and Goal-Adaptive Information Presentation to Support Collaborative Learning in Informal Settings
Eva Mayr

Mapping the Edublogosphere: Implications for Literacy and Teacher Professional Development
Rebecca L. Payne
Bridging: Sustaining Online, Collaborative Knowledge Building over Time and across Collectivities
Johann W. Sarmiento............................................................862

Network Models of Online Communities of Creators
Elisabeth Sylvan...............................................................865

Toward Authentic Scientific Practice: Comparing the Use of GIS in the Classroom and Laboratory
Lori Takeuchi.................................................................868

The Effects of Awareness of Group Members’ Rationale on Collaborative Learning Activities
Lu Xiao.................................................................871

Index..........................................................End of Part 2
